> **EXAM TIP** Every item tests clinical judgment, mostly at application and analysis level: expect priority and next-action questions.

WHAT IS ON IT

AACN CMC test plans; the older plan sums to 101% from rounding

CONTENT AREA	TO 11/18/2026	FROM 11/19/2026
Cardiovascular conditions	23%	21%
Non-cardiovascular conditions	23%	21%
Therapeutic interventions	39%	44%
Monitoring and diagnostics	16%	14%

New or expanded from 11/19/2026:

- Cardiac arrest; SCAD under ACS
- VADs, temporary and durable (such as Impella, LVAD)
- Drugs: ACEI, ARB, ARNI, MRA, SGLT2i, beta-blockers, CCBs, lipid-lowering, pulmonary vasodilators, sedation and analgesia
- Delirium; fluid and acid-base imbalances
- Chest tubes, oxygen devices, cardiac rehab, cardiac MRI and CT
- Adrenal disorders dropped

> **EXAM TIP** Therapeutic interventions are now 44%: drugs, pacing, ICD and CRT, cath lab care, circulatory support and renal replacement (CRRT, SCUF, hemodialysis).

WHO CAN TAKE IT

- Current, unencumbered U.S. RN or APRN license
- ABSNC- or NCCA-accredited direct-care adult specialty certification, such as CCRN (direct or tele-critical care pathway), PCCN (direct care pathway) or CEN; shown as CCRN-CMC
- 1,750 direct-care hours with acutely or critically ill adults in 2 years (875 in the last year, 875 cardiac), or 2,000 in 5 years (144 in the last year, 1,000 cardiac)
- Hours in the U.S. or Canada, or abroad at a Magnet or JCI-accredited facility
- Audit verifier: clinical supervisor or RN or physician colleague; not yourself or a relative

CMC goes Inactive if the tied certification lapses. Non-AACN proof must be valid 90 days past applying.

Renew every 3 years: 432 hours with acutely or critically ill adult cardiac patients (144 in the last year), a current specialty certification, and 25 Category A Clinical Judgment cardiology CERPs or a passed exam.

HOW TO STUDY

1. Week 1: Take a Mock Exam cold for a baseline; read the new test plan. Start Daily Review.
2. Weeks 2 to 3: Therapeutic interventions, with the IABP Timing, Vasopressors and Inotropes, and Ventilator Modes and Settings One-Pagers. Add Impella, ECMO and CRRT.
3. Week 4: Cardiovascular conditions, with Rhythm Gallery and ACLS Algorithms in Brief.
4. Week 5: Non-cardiovascular conditions, with Shock Types at a Glance, Electrolyte Imbalances, ABG Interpretation in 6 Steps and Sedation, Pain and Delirium Scales.
5. Week 6: Monitoring and diagnostics, with Hemodynamic Normals and Capnography. Second Mock Exam.
6. Week 7: Weakest Subject daily; rework Trouble Questions. Third Mock Exam.
7. Week 8: Daily Review, flagged questions, One-Pager skim. Last Mock Exam 3 or more days out.
